: There was a cubic incher at '92 and '93 Dayton Hamventions.
: British G-QRP group had it on display at booth, a member's project, I
: believe. Don't recall a kit being offered.

: It was either a transmitter or xcvr made of surface mount devices on
: cubic inch of pc boards soldered together. May have had a small
: hand capacitance keyer on top - cleverly and neatly done work.

: I seem to have seen a piece on it in G-QRP's SPRAT but do not find it
: among the several issues on hand, nor in QRP Quarterly.

: Others may have a reference.

: Blue Rose Electronics might have something along this line..
: they specialize in SMD kits and parts
: 538 Liverpool Rd, Great Sankey,

: Warrington, Cheshire, England WA5 3LU

: And Kanga U-S, pretty much a one person operation, distributes
: some of G-QRP members' creations in the US.

: Bill Kelsey N8ET 3521 Spring Lake Dr Findlay OH, 45840
: (419) 423-5643. 7-11 pm est

: He may know of the cubic incher's availability, though I do not see it
: in his product handout from the '92 hamvention.

: Good luck,

: 73

The items displayed at the G-QRP Booth the last few years at Dayton have
been the "ONER" series of kits - all on 1" square pc boards. TX, RX, VFO,
QSK, and low pass filter (not 1" square, but about 1 square inch total board
size) make up the "ONER" series. The small unit referred to above was a 2
band xcvr built by one of the members of the G-QRP club, and was never
produced as a kit that I am aware of. It was two bands, including a keyer
and ATU..... Not easily duplicated !

The ONER, although on 1" square boards, would be difficult to put in a 1
cubic inch box.

The CUBIC INCHER is described elsewhere in this newsgroup, and is not a
Kanga kit. Dan's kit is the first version of it in kit form I think.

The info on Kanga US above is correct.....
